BULL SALE

Friday, March 3, 2017 • 5:30 pm

*Offering 135 Simmental, Red Angus & Angus Bulls
at Eichacker Simmental Farm ~ Salem, SD*

SALE DAY PHONES: Barn: 605-425-2391
Steve Eichacker's Cell: 605-421-1152
Jeff Kapperman's Cell: 605-940-5104
Paul Grace's Cell: 605-261-5851

**Bridgett, Brady, Adam, Amanda, Taylor, Dana, Judy
Cathy, Jordan, Nick, Hunter, Steve, Becki, Greg**

**Eichacker
Simmentals**

It's that time of year when Cathy's cracking the whip to finish the sale catalog and get me to write the cover letter. On behalf of Eichacker Simmentals and JK Angus we would like to welcome you to our bull sale. We know and understand that the choices are many when it comes to seed stock suppliers, that's why we believe we have to earn your trust, it's not just taken for granted.

It's the old cliché, the best bulls we've ever had! I'm not going to say there's an individual that is the best we've ever had, but I do feel top to bottom it may be the most even set we have every assembled for your appraisal. As in the past, we feel what sets this sale apart from the others is the variety and selection, whether it's Simmental, Black Angus, Red Angus, Sim/Angus, or Sim/Red Angus, we are your "One Stop Bull Shop".

Steve & Cathy

We will again have Trudeau Insurance available sale day to help insure your investment for loss of use. As in the past, we will pay for half the premium for the 1st year.

Details will be available in the office.

We are still going to run the bulls thru the sale ring but will also be playing pre-recorded videos on TV's above the sale ring. Those videos will also be available to be viewed ahead of time on our website...www.eichackersimmentals.com. Hopefully they should be available about 10 days prior to the sale.

The sale will also be broadcast on DVAuction. We hope you can be with us sale day but if you can't, it's a great option. If you have any questions, contact Justin Dikoff or myself.

Also, I would like to once again thank Glenn Kummer and his crew for raising the majority of the ET calves. They do an awesome job and really pay attention to the details.

We invite you to stop by our respected places prior to the sale to view the bulls. Don't hesitate to give us a call, we love to talk cattle (No Politics), besides, who knows our cows more than we do. On behalf of Eichacker Simmentals and JK Angus, Thank you for your interest in our cattle and hope to see you sale day.

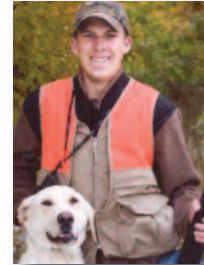

Jeff & Sue

Terms of Sale: All cattle will sell under the suggested sale terms and conditions of the American Simmental Association. Copies will be available sale day.

Announcements: Announcements made sale day take precedence over printed material in sale catalog. Anyone attending this sale attends at their own risk. Eichacker Simmentals or JK Angus or any of the sale force will not be held responsible for any personal injury while attending this sale.

EPDs: The EPDs listed in the catalog are spring 2017 numbers.

Feeding Arrangements & Delivery: We will offer to feed the bulls at no charge until April 15, 2017. At that time they will be semen tested and delivered free of charge up to 300 miles. We will assist in making the most economical arrangements possible beyond that. We are not responsible for any injury or death to the bulls while in our care.

Health: All bulls have been tested negative for BVD/PI. All cows are Johnes free. All genetic defect testing has been completed.

Insurance: Insurance will be available sale day through Trudeau Insurance. They will offer loss of use and mortality. Eichacker Simmentals and JK Angus will pay half of the premium. In no case will seller be responsible for more than the purchase price of the bull. Details will be available in the office on sale day.

Calving Ease Score: We have put a column in with a CE score with 1, 2, 3, or 4 stars, 1 star being harder calving and 4 stars being the easiest calving. It is just our opinion of what you could expect taking into consideration...BW, EPD's, Pedigree and structure of the bull.

Semen Interest: Eichacker Simmentals will retain 1/4 semen interest in all bulls sold and JK Angus will be retaining 1/3 semen interest in all bulls sold. Keep in mind, generally this means absolutely nothing, it only comes into play if semen is collected and sold.

Adjusted Scrotal: Actual scrotal measurements were taken 1-24-2017 then adjusted to a year of age using each breeds own formula for adjusted scrotal measurements. Scrotal measurements for the JK Angus bulls are actual, not adjusted.

Weight Per Day of Age (WDA): WDA is the weight of a bull on 1-24-2017 divided by the days of age.

125 Day Weight: The 125 day gain was the average daily gain from the weaning weight until 1-24-2017.

Homozygous & Heterozygous: A homozygous black bull when mated to any black cows will give you a black calf. A heterozygous black bull carries a red gene, but when mated to black cows will give you a black calf unless your black cow carries a red gene, then you have a slight chance of getting a red calf, but neither will sire gray calves on black cows.

Can't make the sale? Bid from home with DV Auction's FREE "real-time" internet bidding service.

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab.
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction. A DV representative will notify you once you have been approved.
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet is required for successful bidding.** Be sure to check the lag-time monitor in the top left corner to ensure realtime broadcasts.

Proxy Bidding: If you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having Troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at 402-474-5557.

Coming Soon: Videos on all bulls at www.eichackersimmentals.com

DEFINITION OF TERMS

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels.

Back Fat (BF): Inches of Backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario.

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score.

EXPLANATION OF HOW TO UTILIZE API AND TI INDEXES

First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPD's, zero in on the unit difference between bulls. (As described, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a \$50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. X 4 yr. = \$6,000). A percentile - ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more information, visit www.simmental.org.

GENETIC RESOURCES

TAKING GENETICS AND SERVICE TO THE NEXT LEVEL...

Allied Genetic Resources is entering its seventh year of service to our member owners and their commercial customers. Genetic consulting, feeder cattle and replacement female marketing, professional genetic procurement, sales management and a growing semen business are just a few of the customer focused services offered daily by the growing Allied staff. Genetic improvement and value adding service are what separates great seedstock producers from the rest. As the US beef business becomes more competitive and information based, the strength and reputation of your genetic provider will provide the competitive edge you need to stay to the front of the profit race.

Allied Genetics members now number more than 80 in total and in 2017 will market nearly 9000 profit bred bulls. Chosen for commitment to both their commercial customers and the beef business, these independent producers are absolutely industry leaders when it comes to providing value and focusing on the long term. Do the math, the genetics you purchase in 2017 will have substantial profit impacts on your herd well into the early 2030's. Make sure your genetics provider has that kind of impact in mind when they are building seedstock for you. If they reject technology, talk more about philosophy than substance and or don't stand behind their product the way you wish they would, talk to us or any Allied herd about better genetics purchasing for your future. To be confident in consistency and value just look for the Allied logo when you choose a genetics source. Allied by reputation focused on service. Allied Staff:

MARTY ROPP – Get the most profit possible from your genetics by contacting Marty and making a solid and practical plan for the future. 406-581-7835

CLINT BERRY – Get more for your calves this and every year. Contact Clint and his team of Superior Livestock Representatives for details and professional assistance. 417-844-1009

GARRETT THOMAS – Experienced, professional seedstock marketing service pays dividends. Call Garrett for opportunities and proven options. 936-714-4591

ANDREW CONLEY – Andrew brings years of commercial and genetics experience in the Southeast to our growing team. Call him for regional consulting and marketing solutions. 706-781-8656

ROCKY FORSETH – Genetics procurement should have the end in mind. Give Rocky a call to find the seedstock you need then stand behind you when it's time to capture the added value of their calves. 406-590-7984

What a great way to start the sale catalog. The moment he stepped into the picture pen I knew he was going to be Lot #1. This guy is loaded with style, and if you're looking for a CE United son, he ratioed 129 for BW and dam has a BW ratio of 120 on 3 calves, and she has a -4.5 BW EPD. A full sister was a high selling bred heifer 2 years ago in our Dakota Made Sale going to Jim Benda.

Pretty neat pedigree here United X Shear Force X Lock N Load. Keep every replacement female back here, scored his dam a 10 on udder and his Lock N Load granddam is one of my favorites. Lots of CE with a 72 lb BW, 16 for CE and -2.9 BW. He is a bit more moderate framed, yet ratioed 100 for WW.

Here's a guy that is very easy to find in the lot, then when you grab the data he only gets better with age. He has a ratio of 100 for BW, then 107 for WW and 109 for YW, made the top 12 for WDA. His EPD's put him in the top 1% of the breed for WW and YW. From a breeders standpoint we only wish we had more exactly like him. To top it off, we gave his dam a 9 on udder score.

Bulls like this are the reason United is so popular with a ratio of 107 for BW, and 104 for WW & YW. Good uddered cow with ratios on three bulls of 107 for YW.

If you like 'em moderate and thick, he's your guy. One of the reasons United is so popular is his ability to sire calves with very acceptable birth weights, then put them into the top end for WW & YW. If you still have them, dig back into your old sale books, two full brothers sold bringing \$11,500 in 2016 and \$11,000 in 2014. Dam has some neat ratios on four calves, BW 106, WW 106 and YW 109.

One of the more performance orientated United sons with a ratio of 108 for both WW & YW and was the #5 WDA bull, and is also in the top 1% of the breed for WW & YW EPD's. Full brother brought \$9,000 in 2014. Dam has a WW ratio on five calves of 105 and YW of 109.

Don't be fooled by this young May calf. I know the adjustments favor the young bulls, but it did catapult him to the #1 WW simmy bull with a WW ratio of 124. He is the natural calf out of our X75 donor. X75 has an awesome combination of style, yet power.

My recommendation here is to keep the females. His dam has an excellent udder and so does the cow family on the sire side. He hasn't slowed up since weaning, being the #2 bull on the 125 day gain and the #3 WDA bull. His dam has ratios on three calves of BW 102, WW 103, and YW 106.

ES AU56-1

ES W46 SONS LOTS 10-15: We never thought the day would ever get here when we could finally offer a set of calves out of our W46 donor. After three consecutive years of giving her a 10 on udder score and always commenting, "I'd take a whole herd just like her," we made the decision to flush her and haven't looked back since. Look at her ratios on five natural calves, 102 for BW, and then 109 for WW. Her calves are always common sense type of cattle, not extreme in any one category, but low BW, above average growth and very high maternal. The United bull, being her own natural calf, has been a standout all summer and boasts an awesome set of ratios..BW 104, WW 107, YW 103. United X W46, I think we should have flushed her that way, maybe next time. Then you have the flush brothers by Cowboy Cut, may be a bit more moderate in frame than the United, but boy, are they structurally sound and complete. If maternal traits are your main focus, this may be the way to go. Sort through them and see which one best fits your operation or tie some full brothers together to turn out in the same pasture.

Nice all purpose bull with an API of 145. If you're looking for maternal I can't imagine what could be more maternal than a Cowboy Cut X Sitz Upward. Dam has had four bulls with ratios of BW 105, WW 102, YW 104. The first three have averaged \$8,750.

Probably the biggest framed Cowboy Cut son in the offering. Ratioed 110 for WW and has some big WW & YW EPD's being in the top 1% and 4% of the breed. His dam has been flat getting the job done...weaning six calves with a WW ratio of 105 and four bulls went on to have a YW ratio of 111 and the other two heifers were both retained in the herd.

ES T51 SONS LOTS 26-28: The T51 cow family represents performance and power at its best. The dam T51 of these three bulls has weaned six natural calves with a WW ratio of 112, only to be outdone by the granddam P85, who has now weaned 11 natural calves with WW ratio of 112 and YW 111, now that's consistency. The T51 cow is a big powerful cow with a wide top and big hip and rib cage and an awesome udder. Her natural calf, the Load Limit son, was one impressive individual at weaning, being the #4 WW bull with a ratio of 119. I hope you like them because we put in a bunch of full sib embryos to be born this spring. Then we have the two Cowboy Cut sons, a little smoother made but have a trouble free look about them, then check out the maternal #'s...Wow!!

Very similar to Lot 35, both Lock Down sons have the same granddam, X381. Like many of the others, a big spread bull with a ratio of 108 for BW, 112 for WW and 104 for YW. Also gave his dam a 9 on udder score. We have several Chamberlain X X381 daughters in production and they sure look good.

The neat part about using Lock Down on heifers, you don't have to sacrifice performance...it may even add. Take note of the pedigree here, his dam is a high powered individual out of the X381, look at lots 48-53 to find out more on her.

This blaze faced bull is sure to garner some attention for those that want to put a little chrome on their feeder calves, so they know they are crossbred calves when they go thru the sale barn. Amazingly low birth weight, ratioed 121 yet caught up to ratio 101 at weaning. Dam has a good udder with two calves that ratioed 115 for BW yet maintained a WW ratio of 105.

I've got to admit I am a bit surprised how light the birth weights are on the Loaded calves. When he sold in 2015 he was showcased as a big power bull. But one thing we know about Lock N Load, birth weight is not an issue with him. This guy ratioed 123 for BW, yet had a YW ratio of 103, that's defying the odds.

This bull carries much of the same characteristics as his sire, ES Loaded, purchased by Glenn Kummer in 2015. Nice fronted, long sided, adequate muscle and that very distinctive blaze face. He has the look and pedigree to be a trouble free package. Should make some nice replacements. Dam has had four calves with a BW ratio of 109.

This CCR Spartan son should certainly appeal to many especially if CE is a concern. Our Spartans were born small, the others just happen to be heifers. I think you'll agree, there's a lot more than just a calving ease bull here. Try to find a hole in him, I don't see it. Dam has had five calves with a BW ratio of 101 and WW ratio of 103.

X381 SONS LOTS 48-53: This cow and cow family is no stranger to the Simmental breed, the BC Lookout X Glitter is a combination that works. Several full sibs have made it to the backdrop at national shows, and X381 or "Jewel" as known around here has had her share also, one being the champion cow/calf pair at the 2012 North Central Regional Classic. The one trait that stands out and is a reason she is in the donor pen is her udder quality. The first three Lock N Load sons out of her are sibs to the 1st flush we did several years ago where bulls are working in the seed stock herds of Grass/Lunning in MN and Dan Leo, Apex Cattle Co. in NE. Then we have the two CDI Authority sons, we have seen what a nice job Authority has done in our red program especially when mated to Red Angus cows, we thought we would try to make some outcross black genetics. They will be hetero black, but homo polled. Then we have Jewels own natural calf, the GW Stepout son, there's a lot of beef in this guy, he has been one of our main picture bulls in all of our early ads. If you sell them by the lb, I'd be curious as to what you think of this guy.

We haven't used GW Stepout much, although he's an older bull we only used a couple of units a year, the heifers were awesome...one in particular brings \$11,500. So we thought we'd use the semen we had in the tank. This guy ratioed 118 for BW then 102 for YW.

May be one of the reasons Dew It Right isn't heavily used is that his numbers aren't great, but you have a bull you can use on heifers and the calves can work to the top by fall, it's not a bad tradeoff. This guy ratioed 118 at birth then 103 for WW. That's what I'm talking about.

Every year when breeders go through the pens sale day they want to know more about the Dew It Rights, as a sire group they catch your eye. There's a lot of bull here for a 1st calf heifer. When you get ratios like BW 108, WW 104 and YW 104, that's what it's all about. this purebred bull can do a lot of good wherever he goes.

This Bozeman son is different than most, not because of his blaze face, but more for his stunning appearance. He is smooth made, long sided with a nice neck and shoulder, kind of a calving ease look. His dam is one of our rising stars we put her and a full sister in the donor pen. Several full brothers were sale highlights two years ago. Maternal sib sold to Chris Allen in KY last year.

He is the larger framed bull of the Dew It Right sons, if that's what you need. This bull has a lot to offer both phenotypically and on paper, was the 6th highest gaining bull since weaning. That's why his ratios keep climbing with age.. 100 for BW, 108 for WW, and YW of 112. Got to like the pedigree, dam is a United out of our U56 donor.

FRANKES/MPC NIGHT DREAMS SONS LOTS 71-72: Here is a unique pair of bulls that are direct BC Lookout sons. Lookout seems to be an Angus bull that clicks well on Simmy cows. If you study the pedigree here, they are BC Lookout X Glitter on the bottom, the same genetics as X381 or "Jewel" the donor cow and mother of several lots earlier in the catalog. These guys are also full sibs to Adam's fall born show heifer he showed the past two years. These two bulls offer adequate calving ease, but their biggest contribution may come with the heifers kept back for replacements.

Here's a red purebred bull I happen to really like. He is straight in his lines and full of muscle. One of our main picture bulls in the early ads. Ratioed 109 for WW and 108 for YW. Out of one of our oldest Beef King cows, and she is nice. A full brother sold two years ago to Owens Brothers.

I think you'll have to agree, the Authority X Beef King combination seems to work very well. What I really like about this guy, besides his stunning physical appearance, is that his granddam is the T202 cow. Flip ahead about 12 lots to see what an impact she is making.

The last few years these Authority sons have been extremely popular, mainly because he crosses so well on Red Angus cows. I do believe his best asset may be when the females get into production, we have Trump and Crocket cows and they last a long time. This one traces back to a Red Angus cow out of the calving ease bull, Conquest.

I know you're going to ask "what's he doing putting a 121 lb bw bull in the sale?" Well here's the deal...first of all, if I thought he would calve that way, he wouldn't be there. He is an ET bull, look at his EPD's, CE 14, BW -8, that's the top 25% and 30% of the breed. All of the other Authorized born calves had an average bw of 85.8 lbs. If you saw this guy's mother, you would know why we flushed her, she was as nice a looking female as we have with an asesome udder. He's a good one...trust me!

Another red bull that combines the Authority X Beef King blood lines. His sire, Authorized, was one of our high selling red bulls two years ago. We like the fact that the T202 cow is incorporated into the pedigree.

It takes many hands to put on a sale!

Shouldn't take a real cowboy long to find this guy. This long sided beef bull made the top 10 on daily gain. Ratioed 110 for BW then 105 for YW. There's a reason we breed this cow to Beef King every year...it works! We've gotten two beautiful heifers in the herd and Clayton Wobig bought a full brother in 2014.

ES A226 SONS LOTS 84-85: These two bulls are no mistake. Their mother was selected as a first calf heifer to carry the torch for the next generation of the T202 cow family. She is tremendously deep and thick with plenty of milk. With the Prime Time mating, you incorporate a little more calving ease and reinforce the maternal side on what was already a good package. These well balanced traits are why they have a nice API of 147. The A226-1 bull with the lower birth weight could possibly go 4 stars for calving ease with some caution.

One of the deciding factors to use Prime Time was the day Terry Schlenker stopped by and had his mother in the trailer. I knew that's just what we wanted our females to look like. His mother has raised a number of high sellers for us both bulls and females.

Technology at work...using a drone to get the ears up!

EIR T202 SONS LOTS 89-94: What a great way to transition from the Simmy division into the Red Angus division. Without a doubt the cow that has made the biggest impact in our Red Angus program is the T202 cow. Whatever we use on her just flat works and the bulls are sale features. This year is no different. Her own natural calf out of Beckton Epic has been a standout all summer and fall in the pasture. Then the Red Angus flush to Cowboy Kind has three brothers that are pretty cool from a phenotypical standpoint and offer new genetics for old customers. Then it wouldn't be a proper offering without having some Simmy X T202, so we have the two Beef King sons to offer. Over the last few years the T202 bulls have been so consistent and well received with 16 bulls averaging \$7,200. But the best compliment is when producers that had a T202 son come back and bought them again. All we have talked about is the bulls so far, the whole story unfolds as the females come into production and I'm here to tell you, they are nice and will be around for a long time. We already have 1 Beef King daughter in the donor pen. Buy with confidence, the homework is done here.

EIR T212 SONS LOTS 95-97: The T212 earned her way into our donor pen several years ago after consistently weaning bulls that were super stout and thick. She is without a doubt one of our most massive, thick, wide made Red Angus cows we have. When she goes down the alley and chute we wonder if she's going to fit. Several of the customers that bought T212 bulls in the past have commented that as 3 and 4 year old bulls, they are picture perfect out in the pastures. As their pictures show, these three full brothers are very consistent, and I'm not sure which one will be the best bull. It would be an excellent opportunity to put several full brothers together. Whether you're selling them by the lb or keeping replacement heifers, these guys should work. On a side note, T212 just calved again, having a 91 lb, thick topped Beef King daughter. She has plenty of milk so back in the donor pen she will go.

Not too often do I give a bull that ranks #1 out of 11 for WW in his contemporary group and was the #1 bull for YW, four stars for calving ease, but with some caution we feel he could go that way. Out of a granddaughter of the T202 cow, where I said the best part may be the females back in the herd, well here's proof. Great calf out of a great cow family where I scored her dams under a 9+ last spring. Truly looks to be the total package here.

From a phenotype standpoint we really admire this bull, nice headed, smooth made, yet thick with a nice muscle pattern. He has a little more age than some of our March born bulls and should be an easy find in the pens on sale day. I believe his sire sold for \$70,000 three years ago in the Pieper Sale.

If you're looking for a Red Angus bull with a bit more frame, this would be our recommendation. This smooth made individual was our #2 WDA bull. A maternal brother brought \$9,750 two years ago, going to Jim Peterson. Dam has a WW ratio at 103 on 5 calves.

We only have one Rollin Deep son in the sale. He is a product of our continuing search for some outcross genetics. Unfortunately for the bull sale, most of the Rollin Deep calves were heifers.

Good bulls come from good cows and cow families. I scored his dam a 9 on udder and goes back to the T202 cow for a granddam. He was our #2 WW bull in the Red Angus division and has WW & YW EPD's that put him in the top 10% of the breed.
