Welcome to our Bull & Female Sale

The Eichacker Simmental Family

Steve & Cathy, Amanda, Dana, Hunter, Taylor, Adam, Judy, Becki & Greg, Bridgett & Brady, Nick, Jordan, Ellie & Emmitt

Herdsmen, Paul, Lindsay, Sawyer, Hayden and Lincoln Grace

The Kummer Crew!

JK ANGUS
Jeff Kapperman Family

John, Laura & Colton,
Billy, Jeff & Sue, Angie
& Rowdy, Patti & Ross

With everyone's busy schedules we'd like to take the opportunity to welcome you to the Eichacker Simmentals & JK Angus Production Sale. If you are a past customer, thanks a ton for your confidence in our programs. If you haven't been to our production sale in the past, come on over and spend the afternoon. Even if you don't need a bull this year, we'd love to show you what we have to offer. The variety from Simmy's, red to black, Black Angus & Red Angus, bulls to females is simply mind boggling. I'm sure you'll find someone to visit with and our crew's hospitality won't send you home hungry.

Mother nature is going to have to be kind to us this spring as our subsoil moisture got depleted this past year. The snowfall this winter has been zero to none, although it's been a great winter for choring and as we all know a timely wet snow or rains in the spring can replace all the snow you fight with all winter. We are farmers, we must be optimistic.

Being structurally sound has gotten a little personal this past year. As we get older the aches and pains are setting in, Steve with a new hip and Cathy looking at a possible knee replacement and Jeff's not exactly in marathon shape either. Cattle that are functional and on a good running gear is a priority.

Collecting DNA and doing genomic testing provided by ASA and Neogen and the Genetic evaluation programs developed by Mahdi Saatchi and Top Genomics, Eichacker Simmentals is committed to providing you with the most accurate and up to date data to help you in your selection process and hopefully makes it easier.

Another big thank you to Glen Kummer and his crew for raising the majority of our ET calves, they do a great job! Have to admit though, we are glad to see the forecast warmer this year for the main week when the ET calves are born...hopefully keep a few more ears (Ha-ha). As usual the pheasant hunt with his crew was a nice bonus to finish the year.

The sale format will be the same as past years. Videos will be on our website a couple of weeks prior to the sale, as we will have a video auction on DV Auction.

The cattle are always available for viewing prior to the sale. The Simmentals and the bred heifers are at ES and the Angus bulls are at JK Angus about fifteen miles apart.

Thanks again for your interest, trust, and loyalty to our programs, it is not taken lightly. If there is anything we can do, don't hesitate to give any of us a call if you have any questions. See you sale day!

Eichacker Simmentals & JK Angus

**VIDEO AUCTION ON
ALL CATTLE!**

• No cattle will go through a sale ring •

Friday, March 4, 2022 at 1:00 PM At Eichacker Simmentals, Salem, SD

DIRECTIONS TO SALE SIGHT: Eichacker Simmental Farm, Salem SD: Exit 368 (Canistota) on Interstate 90, go 2 miles North, Eichacker Farm is on the East side of the road. From Salem: Hwy 81 & 38 intersection, go 4 miles East and 1.5 miles South. Farm is on the East side of the road.

SCHEDULE: Cattle may be viewed at the farm any time prior to Friday, March 4, 2022.
Friday, March 4 Cattle on Display at Eichacker Simmentals
Complimentary Lunch Served 11:00 AM
48th Annual Eichacker Simmental Bull & Female Sale ... 1:00 PM

Featuring Simmental, Red Angus & Angus Bulls & Females

Motels

Best Western U-Bar Motel, Canistota, SD 605-296-3466
Hampton Inn, Mitchell, SD 605-995-1575
Quality Inn & Suites, Sioux Falls, SD 605-336-1900

Terms of Sale

All cattle will sell under the suggested sale terms and conditions of the American Simmental Association. Terms available sale day.

Announcements

Announcements made sale day and from the block take precedence over printed material in sale catalog. Anyone attending this sale attends at their own risk. Eichacker Simmentals or any of the sale force will not be held responsible for any personal injury while attending this sale.

EPDs

All Simmental bulls and females have genomic enhanced EPDs.

Feeding & Delivery

We will offer to feed the bulls at no charge until April 15, 2022. At that time, they will be semen tested and delivered free of charge up to 300 miles. We will assist in making the most economical arrangements possible beyond that. We are not responsible for any injury or death to the bulls while in our care.

Volume Discount

Volume Discount on bulls ONLY: 3 bulls 3%, 4 bulls 4%, 5 or more bulls 5%

Insurance

Insurance will be available, details will be announced sale day. In no case will seller be responsible for more than the purchase price of the bull.

Health

All bulls have been tested negative for BVD/PI. All cows are Johnes free. All genetic defect testing has been completed.

Calving Ease Score ★ ★ ★ ★

We have put a column in with a CE Score with 1, 2, 3 or 4 stars. 1 star being harder calving and 4 stars being the easiest calving. It is just our opinion of what you could expect taking into consideration the BW, EPDs, pedigree and structure of the bull.

Semen Interest

Eichacker Simmentals will retain 1/4 revenue sharing semen interest in all ES bulls selling and JK Angus will retain 1/3 revenue sharing semen interest in all JK bulls selling. This means if we would like to collect semen on the bull for our own use, we would have the option to do so. Also, if semen is sold ES would retain 1/4 revenue from the ES bulls and JK would retain 1/3 revenue from the JK bulls. The new owners of the bulls will have full possession and full salvage value.

Adjusted Scrotal

Actual scrotal measurements were taken on 1/26/22, then adjusted to a year of age using each breed's own formula for adjusted scrotal measurements.

Weight Per Day of Age (WDA)

WDA is the weight of a bull on 1/26/22 divided by the days of age.

141 Day Weight (PWG)

The 141 day gain was the average daily gain from the weaning weight until 1/26/22.

Homozygous & Heterozygous

A homozygous black bull when mated to any black cows will give you a black calf. A heterozygous black bull carries a red gene, but when mated to black cows will give you a black calf unless your black cow carries a red gene. Then you have a slight chance of getting a red calf, but neither will sire gray calves on black cows.

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

MARTY ROPP 406-581-7835

RightMate
powered by TOP GENOMICS

We are honored to again present an embryo lot in support of the American Simmental/Simbrah Foundation.

With Cathy as a member of the ASF Foundation Board and Steve a member of the ASA Board of Trustees, it's a great way for us to give back to the breed that has been so good to us the past 50 years.

The ASF is a great avenue to support the 4 pillars within the Foundation that consist of Research & Technology, Youth, Education and General. The winning bidder of the embryo lot will have the privilege to designate which pillar the funds will go towards. 100% of the sale of this lot will be donated.

Thank you to Windy Creek Cattle Co. for purchasing our Legacy Lot in 2021!

Steve, Cathy & Adam with Windy Creek Cattle Co.
Jeremy, Bethany, Cash & Emerson Lehrman

**Foundation
Legacy Lot**

Winner of this year's gun was Circle M Farms

Gun Raffle donated by Eichacker Simmentals, raising nearly \$50,000 for the Foundation the past 3 years.

For 2022 we are offering 1 package of 3 embryos from our donor ES A110 from various matings

(Guaranteeing 1 pregnancy if done by a certified technician.)

ES A110

#2752773

The A110 donor has highlighted past sales with progeny and offers 5 different matings to choose from.

ES A110, Dam of Lots 1-7

The A110 is not content just hitting singles to get on base. She continues to swing for the fence much like Barry Bonds. Actually they have a lot in common, with the help of some drugs they've been very successful, in A110's case it's through embryo transfer. What a set of bulls these brothers and maternal brothers are. I spent a fair amount of time evaluating them and may be more confused now than ever. Two months ago, we didn't think the TJ Chief bull, JA110-1, could hold a candle to the others, he's a month younger than the others but is sure coming on strong. I expect him to be even closer by sale day. The next two, JA110-2 & JA110-3, are full brothers to ES Right Time who is one of the most exciting young bulls in the breed. Many acclaimed cattlemen say he's one of the best footed Simmental bulls they have ever been around. I'm certainly not claiming either of these two are better than ES Right Time, but they are definitely worth your time and consideration. Then we have the four Progressive sons. Two are solid black, one is a blaze face, and the other is a brockle face. When Progressive semen became available almost two years ago our A110 cow was set up to flush and we thought "why not". If he's going to work, let's use our best cow. All seven of these bulls have something to offer, a couple are absolute beasts and a couple are very eye appealing, attractive bulls. They are all in the upper end of the charts for WDA or PWG (post weaning gain). Some are higher on one chart and then the others rank higher on the other chart. All are very sound footed which comes from their mother and the maternal side should be solid as well. Even around them every day it's amazing how they are changing, it will be exciting to see your opinion on sale day.

If you demand consistency this may be as good as we can offer. This is the 4th bull from the C72 cow, and they have all been standouts. She has a YW ratio of 110 on four calves. She offers one of our go to pedigrees that has withstood the test of time, Authority X Beef King back to our foundation T202 cow. Not only does she bring home the beef but keep the heifers too. We scored her very high each year for udder quality. Study him hard we think you'll like him.

This powerhouse beast is no accident; his maternal brother was our lead off and high selling bull going to Doug Bichler in last year's sale. He is backed by a cow family and pedigree that has withstood the test of time at ES. Authority X Beef King X the T202 foundation donor, then come on the top side with the \$180,000 Fort Knox bull and it's like standing amongst royalty. When you combine his mass, structural correctness, overall stunning appearance he'll have a pen full of admirers sale day.

If this stud doesn't get you excited you better check your pulse to see if the old ticker is still working. The last time I got this excited is when Cathy said "yes" she would go to the prom with me! Let's just say that was a few years ago. My visual appraisal finds him being a really cool individual. I like everything about him from the tip of his nose to the flex in his rear pastern. There's no doubt his calves should grow with the powerful X75 on the bottom of the pedigree and he's the #8 bull for PWG (post wean grain).

This guy is an attention getter, you'll catch yourself taking a second look with his blaze face and his two black coon eyes looking at you. You'll also enjoy his extra shape across his topline and sappy middle.

This Fort Knox is easy to like, quite honestly, he reminds me a lot of what his sire looked like at his age. Loaded with meat and muscle, sound footed, and that long neck extension that oozes with sex appeal. Even has that black star on his head. His calves will definitely have value, he ratioed 105 for WW and 107 for YW and made the top 10 for WDA.

I don't think there will be any argument that this purebred Fort Knox son has quite the striking profile and the data to go along with it, ratioing 110 for WW then 111 for YW. In the Fort Knox sire group, he boasts the heaviest WDA and 8th on the chart among all Simmental bulls. Without question his dam is the best Beacon daughter we have had, which correlates into a very solid EPD profile.

Can you feel the excitement of your local sale barn when a set of calves come in the ring sired by this homo black, homo polled purebred bull on a set of British based cows? He offers a bit more skeletal frame and length than a few of the other Fort Knox sons. His Hook's Broadway dam has always received high marks on udder score.

I'm pretty sure the Z111 will demand some attention sale day. He got that picture pen presence that the Fort Knox cattle seem to have. We've done this enough years you just know when an animal steps into the pen whether they are photogenic or not. We also believe it follows sire groups. The reality is he's a lot more than just a pretty picture and there's a lot of cow power on the bottom of the pedigree with Chamberlain and the U56 cow.

I'll repeat what I have said before, once you see a Fort Knox, the rest have the same look, as is the case here. He comes with a few bells and whistles, maternally he's very solid, look at the girls in the support photos. His dam in her younger years scored a 9 on udder quality 5 years in a row. He also knows how to turn feed into red meat, he's in the top 20% for both WDA and PWG, so don't let him slip through the cracks.

The dam of this pair of bulls is an absolute brute, not exactly how most females like to be described, but we are in the beef business raising pounds of beef. These guys are a set of twins, but we left both on mom as we felt she had the ability to handle them. One of them has the look of a solid beef bull, the other a little smoother and has more of a maternal look. The A226 cow has done a nice job in the past with many sons working in some very prominent herds.

He has all the indicators of being a Fort Knox son right down to the white star on his head. He has the length of side, the long neck extension that comes out of his shoulder relatively high. We gave his CDI Authority dam a 9+ on udder score.

Sons of ES Right Time

Looks like if you want some cattle that will gain in the feedlot these Right Times are doing it. This guy is #2 on the list for post weaning gain, the only one above him is another Right Time. He only ratioed 100 at weaning time then apparently everything he ate converted to red meat and ratioed 113 for YW to be the #6 YW bull. You can't really appreciate this bull until you get behind him, he's wide from the top of his loin down to his base width. He comes with the ES stamp of approval.

If you're serious about the beef business and owning a Right Time son this young April bull needs some serious consideration. This stud ratioed 107 for WW then exploded to be the #2 bull for YW ratioing 117. As you would expect, that bodes well for WDA and PWG where he shot to the #1 spot on both categories. From a phenotypic standpoint he's got a lot of the right parts that make a great breeding bull. Look him up and give him a big wave or 2 or 3 when he's on the big screen on March 4, we'll let you know if you wave too much.

We have the tale of beauty and the beast with these two bulls. The genomic enhanced EPDs have described the difference in the 2 full brothers exactly how our visual appraisal would go. The rugged power and performance bull is JE12-1, the lower birthweight, more refined attractive bull is JE12-2. They come in two different packages although the reality is they are only 20 lbs. apart for YW so just a matter of personal preference as to who your favorite is.

Gotta admit this guy slipped through the cracks on picture day. I actually gave him some very complimentary marks in the pen. He started out a little slow but has sure come on being in the top 1/3 for post weaning gain. I don't know if he'll catch his other Right Time 1/2 brothers but he's making a run at it.

Probably the cleanest made of the Right Time sons, he offers a smaller calving ease looking head that blends into his shoulder quite nicely and offers some rear muscle expression that is above average and offers some top end WW & YW EPDs. I would consider him to be one of the better candidates for calving ease in the Right Time sire group.

The D123 cow has a knack for stamping her calves with a little extra flair. Whether keeping replacement heifers or selling feeder calves we all like a little eye appeal in the pen. His maternal brother selected by the Nelson family in 2020 was one cool cat. This guy offers all those qualities in a smooth made trouble free package. Keep the females, we have always given his dam high marks for udder quality.

If keeping replacement females is a main priority JD130 comes with high recommendations. His granddam, W46, set the standard around here for many years on udder quality, his Cowboy Cut dam only enhances the package. The icing on top of the cake is the A110 cow on the top side, as you can see the deck is well stacked.

*Sons of TJ Gold*

32

This royally bred bull gets us jacked up a bit. Sired by the new hot Eagle son, TJ Gold. He sired a couple of the lead off and high selling bulls at the recent Triangle J sale. His dam is a Proclamation out of our mainstay donor A110. Has a small calving ease looking head but from there on back, he's all bull. His actual weights are what we strive for, ratioing 95 for BW, then 111 for WW and 109 for YW. Genomically he's one of the best we have to offer with 14 EPD traits ranking in the top 25% of the breed.

TJ Gold 274G, Sire

For those that are number crunchers this purebred TJ Gold son stacks them up awfully nice. His EPD evaluation put him in the top 25% of the breed in a whopping 13 categories. His granddam was an \$18,000 heifer selected out of the Hook Farms production sale in 2016. If I remember correctly, it was Valentine's Day and it was my present to Cathy. For the record she was with me and had a very romantic lunch at Subway on the way home.

My prediction is this guy will be the high performance of the TJ Gold sons. He is the #2 WW bull ratioing 115 and is probably the larger framed, longer sided of his 1/2 brothers. I'm sure he inherited some of that from his grandam, X75, one of our mainstay performance cows. We really like his Cadillac mother and appreciate her overall mass yet maintain her feminine side; JG175 & JG176 dams are full sisters.

A purebred TJ Gold son that is homo black and homo polled, out of a 1st calf heifer that received a 9 on udder quality last spring. That's not surprising as his granddam is the A4 cow who has a whopping WW ratio of 110 on 7 calves and is the mother of a good Black Powder bull in the offering (ES JA4 Lot 52). If it's growth you want his WW & YW EPDs put him in the top 10% and 3% of the breed.

A homo black, homo polled purebred sired by the up and coming bull, TJ Gold. We were fortunate to have TJ Gold run with a pasture of young cows here at Salem this past summer. He was a very complete bull that blends together very well from front to back and had a good set of wheels under him. Gold calves are born easy and have above average growth. He also does a wonderful job of improving a set of EPDs from one end to the other.

We got a lot of stars by this one and if you are reading this I hope you find him too. There's a lot to cover here, starting with his WW & YW ratios of 113 & 108, then notice his EPD profile where he excels in 12 categories. It really cranks up the heat when taking into account the maternal side of his pedigree where his dam has a beautiful udder and his granddam is the A110 cow. Looks like the F33 cow is making a case to be A110's replacement someday.

If you're after growth and carcass, his data set indicates JD121 needs some consideration, WW, YW and marbling are all in the top 5% of the breed with ribeye not far behind. His sire, Genesis, is a bull we added to our lineup last year because of his overall genetic value. JD121 is one of my favorites in the Genesis sire group. The udder quality on this cow family is rock solid.

ES HF81, Maternal Brother

A homo black, homo polled purebred Genesis son that offers a little more frame and length of body. His individual performance and EPD profile both indicate he should be used to add performance to a set of calves. Would be a good choice on a set of British based cows. Dam has a WW ratio of 105 on her 1st two calves. Last year's was a standout that went to Ryan Meyer.

Low birth weight and above average growth, nice combination. Another 1st calf heifer with an udder score of 9, I'm seeing a common denominator, several of these go back to the W46 as the granddam. Jumped through the genomic testing with flying colors and tested homo black and homo polled.

This fella ought to add some pounds to a set of calves with WW & YW's ratioing 105 or higher and growth EPDs in the top 10% of the breed. His sire, ES Statement, was selected by Windy Creek 2 years ago. He was one of the performance bulls in the lineup, but we used him on a few heifers and knock-on wood got along just fine. He is out of a nice uddered 1st calf heifer.

We really admire this April born purebred ES Statement son for how smooth made he is and how well everything blends together. He strikes us as a very complete "no holes" bull that backs it up with his EPD profile. He is only the 2nd calf from his young dam, but she is off to a great start with WW & YW ratios of 109 & 105 and has received high marks on our udder score chart.

This blazed faced Turnpike bull should make a few hands go up in the air sale day. We've had a soft spot for him all along, we even used him in our early ads. He's got that factor you don't see on paper, we call "Ring Presence". He's a maternal brother to the ES Statement bull purchased by Windy Creek in 2020. There are several Statement sons in the offering and I'm sure Jeremy will have a fair shot of them in their bull sale in early March.

One of the larger framed bulls in the Simmental division. If you like selling them by the pound and retaining some females, stay tuned, he's in the top 10% of the post wean gain. His dam has a history of bringing home the beef, her natural calves have a WW ratio of 108 and YW ratio of 109. She has raised sale toppers like ES Epic to Wayward Hills Farms and an awfully nice bred heifer going to Hoffman Ranch last year. I believe our embryo inventory indicates this may be the last hurrah for the B94 family.

The feet and leg structure on JE42 reminds us a lot of his sire, Turnpike, when we first saw him at Denver in 2018, he was so impressive how well he moved for being one of the more massive bulls in the yards. Little did we know he was going to end up at one of the most prominent seedstock operations in the country, just 30 miles away, Werning Cattle Co. when we saw him in 2020, he was as sound as he was as a calf.

We only have a couple Black Powder bulls in the offering as the bull is deceased and semen is hard to come by. For several years now they have been the hot sire group at the Trinity Farms Sale, averaging about \$2000 more than sale average. No matter which angle you come from you're going to like this bull much like his full brother that went to Kendall Sweet last year. This is his dam's 6th calf, five have been bulls and all have made the bull sale and the heifer is in the herd.

ES HA4, Full Brother

Here's one of those curve bending low birthweight and high growth individuals we all strive to raise. He started out with only a 73 lb. BW then went on to ratio 107 for WW and 105 for YW. He's on the upper end of the chart for WDA. The part that gets us super excited is his dam's WW ratio of 110 on seven calves. His full brother got a ride to Nebraska last year and is working for Mark Hintz.

When it comes to generating excitement as to which cow has had the most influence in the Simmental breed many conversations would start and stop with WS Miss Sugar C4, the mother of ES C4-1. If you look her up in the database, she currently has 115 progeny recorded. He is a tremendously long sided bull that when you step into the pen, he grabs your attention. I'm not sure if it's his ears or lack of, as he was born on a cold February day. Our search for new fresh genetics led us to purchase an embryo package on the Keller's Production sale 2 years ago. The homework and promotion are already done, just step up and help yourself to some of the most sought out genetics in the breed.

I know a lot of you cattlemen like a bull with a little more frame, if so, the stars are really aligning for this stud. He started out with an actual birth weight of only 74 lbs. and went on to ratio 110 at weaning, maintained the momentum to ratio 114 for YW and was the #4 YW Simmy bull. He also makes the top 10 for WDA and is #6 for PWG. His EPD profile shows 10 traits that are in the top 25% of our database. Behind every good man is a good woman, in my case a better woman, he's got 4 generations of maternally solid cows in his pedigree, that's quite a resume he has compiled. His calm disposition is almost annoying.

This low birth weight, high maternal bull would be an excellent choice to retain some females out of with the C4 cow on the top and W46 on the bottom of the pedigree, the guess work should be done. LCDR Progressive is the sire of a number of ET bulls out of the A110 cow, he is in the Select Sires lineup and is a bull you will be hearing more about in the future.

This blaze faced purebred Favor son is easy on the eyes. We admire him for his overall width and dimension. Personally I feel a set of feeder calves with a little white blaze on their head, so feeders know they are crossbred, are hard to beat. This bull checks a lot of the boxes on his genetic profile being in the top 25% of the breed in 12 traits. He will add value to your calves.

LCDR Favor, Sire

As the data is being put together, JE37 is slowly compiling his case on why he should be considered by the serious breeders. First off, he's a bull that you easily gravitate to in the pen. We love how his neck comes out of his shoulder and how attractive his front 1/3 is, offers plenty of muscle and is on a good foundation. His WW & YW ratios are 108 & 109 and is in the top 5 for WDA and top 10 for post weaning gain. Bulls like this are fun to analyze.

These 2 are ET calves by different sires out of the W46 cow, she's been quite a cow for us. She's now 13 years of age and one of the very few cows that has received a 10 on udder score and she got that score many times. The W46 cow also showed up many times on some of the good maternal bulls in the offering as the granddam. To stand these two bulls side by side there are some major differences. It's when you look at the data and there's almost 2 months age difference and look at the Adj 205 weight and YW they are only 12 lbs. apart, maybe they are closer than they appear. But for now, I believe the JW46-1 is the larger framed performance bull, while JW46-11 looks to be a little more refined and cleaner in his makeup, so in my opinion the calving ease bull of the 2 which is exactly what the BW's and EPD's indicate. Whether they are the same or different, they both will be great maternal bulls.

TJ Main Event, Sire

This bull really grows on a person as you sit and gather all the information. His sire, Main Event, is an older bull we don't use much of anymore but when you get a bull of this caliber you have to ask why. He's put together as well as any, his front 1/3 is picture perfect, from there on back he's long sided, has some depth of body and a rear end with some muscle shape. Ratioed 112 for WW and 103 for YW and backed by a cow family that is rock solid, his granddam has a WW ratio on 10 calves of 104, that's predictability.

TJ Frosty, Sire

Two years ago one of our featured and well received sire groups were the TJ Frosty sons. They were nice but as with all breeders, we are always searching for new genetics, so we tried a few Frosty sons instead. The JG16 bull reaffirms we may go back and just use Frosty himself. This TJ Frosty herd bull has some high octane gas in the tank with WW & YW ratios at 113 and 112 and growth EPDs in the top 3% & 4% of the breed. No matter which direction you analyze this bull, he just offers more of everything, this bull is high on our list.

65

TJ Teardrop, Sire

He is the only Teardrop son in the offering but it's not because we don't like them, it's because there is no more semen available. This blaze faced Teardrop X Proclamation son is a brut. Has some consistent growth figures being the #3 WW and #5 YW bull in the offering. You don't have to go very far down the list on WDA and PWG to find JG96, the icing on the cake is he is backed by 3 generations of cows still in production and all have scored 9's on udder scores for multiple years.

As you can tell by the support pictures his Dam, A71, has no trouble stamping out a good one, what's amazing is she did it using 5 different sires. She has had six bulls with a WW ratio of 105. I had in my notes that I would really like him just a tic bigger, then I realized he's the youngest bull in the offering born on 4/26/2021.

It's safe to say this guy is probably not going to sire the next national champion show heifer, but if you're looking for soft made, deep bodied beef bulls, he's your guy. Was the #4 WW bull ratioing 114 and the #14 YW bull ratioing 108. Keep the females here, two of our really good cow families are represented here, X75 and W46. Dam is a full sister to the dam of JG168 bull (Lot 43).

Traces back to the T51 cow on the bottom of this pedigree. Years back we used her in ET and the herd book shows she has 55 calves in the ASA database. At 15 years of age, she is still in production and has WW & YW ratios on her calves of 103 & 105. Another bull where retaining females comes highly recommended.

This trio of bulls offers a great opportunity to tie some brothers or ½ brothers together. Naturally there are some differences. The red bull, JE78, is the natural calf of the E78 cow, on paper he's the performance bull ratioing 113 for WW then 108 for YW, all around solid bull. Then the two black full brothers sired by the \$180,000 Fort Knox bull, they are very similar in type and kind being moderate in size with plenty of base width and rib shape. As with many families the glue that holds them together is their mother, E78, she was a heifer that Adam showed back in 2018. She may never have won a banner but was always in the top 2 or 3 of the class. The judges' comments were always consistent, she may be the best cow down the road and from a structure standpoint she is sound and moves as well as any animal out here.

Sons of CDI Trustee

Hang onto your hat and saddle up cowboys. We are extremely proud to put our brand on a bull of this caliber, he was a fan favorite in the pasture all summer. If you sell them by the pounds, he should be on your short list. Ratioed 113 for WW then kept going to ratio 115 for YW and is in the top 5 bulls for WDA. We really appreciate how massive he is yet soft made and moves like a cat. Comes recommended for replacements also, his dam has a very nice udder.

This red purebred is a solid prospect. We brought CDI Trustee into our AI arsenal to do just what we see in this individual. A bull that the commercial cattle industry can tie onto to breed cows and have more pounds to sell in the fall. He's a little younger but coming on strong. Would also be a good choice to increase ribeye in your herd.

First off don't overlook this bull due to his size, he's the second youngest in the offering. He has an awesome profile and a nice hip from the rear view. Gets around on a good set of wheels with lots of flex in his pasterns. He's a great combination bull, merging the power and eye appeal of CDI Trustee with the calving ease of his dam, D65, who carries a low BW ratio of only 84 on four calves.

We've offered for your appraisal many full & ½ brothers out of the X75 cow over the last 12 years. One of the most interesting groups were the 5 direct sons of the X75 cow in last year's sale. Two of those were full brothers to the two all Aboards in this year's sale. The CDI Abundance son also had a full brother selling in 2019 and was received very well. I'll cut to the chase; we feel the real powerhouse red bull of the whole offering is probably Lot 77 JX75-1. He just does a lot of things right including 9 EPD categories in the top 15% of the breed, he also ranks #7 for WDA and #4 for PWG. He's a standout bull you might say a man amongst boys. Then you have the two All Aboard sons, they offer a less BW EPD yet have WW & YW EPD's that rival their Abundance ½ brother. All three offer a little more skeletal frame and length of spine. The X75 cow has always maintained an excellent udder and has a great running gear under her.

Here's a homo polled red bull that really checks all the boxes. Ratios 94 for BW which is good, you want that lower than 100, but then explodes on the growth side to ratio 111 for both WW & YW, #'s like that naturally rank him in the top end of the group for PWG (post wean gain). The dams of JG175 (Lot 34) and JG176 (Lot 80) are full sisters. The Cadillac X X75 mating is probably one of her best.

ES F118, Maternal Sister to Lot 81

A low birth weight bull that quite honestly should be a maternal dream. The maternal sisters in the support photos were just darn nice cows from what I remember. His sire, Abundance, was a bull we used several years ago, that sire group was so well received by you, the commercial cattleman, we went back to him.

ES G47, Maternal Sister to Lot 81

The pedigree and numbers on this bull would indicate growth. Don't be fooled by his birth date, his sire, CDI Abundance, was one of the most sought after sire groups a couple years ago in our sale. The real value here may be on the replacement female side. Her maternal sister purchased by Lehrman Family Simmentals a couple years ago was awfully nice and raised one of their biggest calves this year.

Based off all the data we have gathered and research into the cow family this homo polled bull gets a head nod as our favorite red baldy. There again that's just our opinion what really matters is yours on sale day. So you ask why? Is it his WW ratio of 106? Is it that he is in the top 25% of the Simmental database in 10 economically relevant traits? Or is it his jaw dropping presence? Yes, those are all good but it's the cow family behind him, all the way back to the T202 foundation Red Angus cow which is 4 generations.

When you find something that works, I guess you stay with it, at least we did with CDI Authority X J225 mating as you can see by the support photos. They are all natural calves and full brothers, there's also a full sister in the sale ES H82 (Lot 163). If these 4 bulls were a flush, you'd think you had one of the most consistent flushes we had produced here at ES. I know the EPDs don't indicate it, but we have always felt Authority was one of the most predictable matings when used on Red Angus cows. Keep in mind he's just a mid-April bull.

We kind of came in the back door on this mating, most of you who have followed our program know we do quite a little using purebred Simmy's on Red Angus cows. This time we used a Red Angus on a purebred Simmy. His sire, Guidance, was the high selling bull a couple years ago at Eagle Pass commanding about \$70,000. His dam, B34, is a high-powered cow we have used in our ET program. She had 4 sons in last year's sale that were truly meat and potato bulls.

I would like to give this 66 lb. BW bull 4 stars for CE but looking at the cow power on the bottom side of the pedigree a caution flag comes up. His mother was the 2nd heaviest WW heifer out of 117 in her contemporary that year, so when that big heifer laid down and had a 66 lb. calf, we assumed there would be twins, but there was only 1 calf. Depending on your tolerant level, he could possibly be used with some caution. We love how smooth and well balanced he is from front to back.

Not every bull sale you go to has an opportunity that allows you to sort through a set of ET brothers that are heifer bull candidates and a cow of this caliber. I went ahead and gave them all 4 stars for calving ease, their birthweights only differ 6 lbs., 66-72 lbs. Their dam, X210, has a BW EPD of -4 lbs. and their sire, Silverias Mission Nexus, is a -3 lbs. BW, so the bulls all have a -3.5 lb. BW EPD which puts them in the top 20% of the breed. The neat part is they are not little dinks, they have some frame and stretch. Their dam, X210 has not missed, she had nine natural calves before we flushed her, and every heifer made the replacement pen and every bull not only made the sale but were in the picture pen and many used for ads. Not only do these ET bulls offer some low BW genetics, but they are high maternal and carcass candidates also. There are some slight differences among them, yet they are very similar. Happy Sorting!!

A little larger, long sided bull out of a 1st calf heifer. Make Mimi is a bull we have used on heifers for what seems to be 15 years now. This guy could possibly be used on some larger framed heifers with some caution. He also has the T212 cow as a great granddam.

From a visual appraisal standpoint, the JF217 is hard to fault, and we probably gravitate to as one of our favorite Red Eagle sons. He's smooth from end to end, has some muscle and base width, all the things we look for in a good breeding bull. His grandam is our T212 cow who we thought enough of to flush several times.

EIR GC212, Maternal Brother

This guy happens to be one of our favorites, he is so soft structured with a big sweeping rib cage and plenty of muscle. We saw his sire, Red Eagle, a couple of years ago at the Eagle Pass sale and knew he was a bull to use if semen was available, we had to sample.

He's the #2 YW and WDA and #3 WW bull. There's a lot of quality on the cow side, his granddam is our T202 cow who is in more pedigrees than any other Red Angus cow we have had, she pops up in quite a few Simmental pedigrees also. His dam, A225, has never missed, six calves with a WW ratio of 106, five of those have been bulls who have all made the sale.

This should be the easiest decision you have to make sale day this guy is #1 in several categories Adj YW, WDA, and #2 for WW. His EPD profile has him in the top 10% of the breed for WW & YW. Here's where it really heats up, this is the 3rd year in a row his dam, E200, has had the #1 Red Angus performance bull. Two years ago, her bull even outgained the Simmy's. She is a pillar of predictability with her three calves ratiating 108 for WW then 122 for YW.

The T212 cow pedigree has popped up in a lot of pedigrees throughout this catalog on both the Simmental and Red Angus. She has been used in ET quite successfully. The #s would say heifer bull but I'm a little hesitant knowing the power on the cow side but could work with caution.

Fellow cattlemen and women,

Welcome to the JK Angus division of the sale. It's been a hectic year for us. We were lucky enough to be part of the SD Angus Tour this year. It was a great event and we made many new friends. We were also blessed to be selected as SD Angus Breeder of the Year. It was a big surprise and a tremendous honor. Thanks to my family for all they do to make it all possible. This group of bulls represent over 50 years of selection and breeding. Take a look. We're very proud of these bulls. Give us a call or stop by, we would love to visit with you.

Without a doubt one of the highlights in the female offering. Her dam, A110's progeny has surfaced to the top of the bull division the last few years. Wait until you see the A110 progeny in this year's sale, they run deep. H122 is also a maternal sister to ES Right Time, currently one of the hottest bulls in the breed, owned by CK Cattle and Hilltop Simmentals. If she were to stay here, it's almost certain she would go to the donor pen.

ES D24, Maternal Sister

Pedigree for Lots 138 & 139:
 CCR Cowboy Cut 5048Z
 TJ Franchise 451D
 TJ Miss Net Worth U11
 Remington Lock N Load 54U
 W/C Miss Werning 480B
 Bushs Big Blackbird 7880

If you like them stout and powerful these two full sisters ought to be on your list. Several years ago, we went to the Werning sale with a mission to find the most powerful Lock N Load daughter in the offering. We feel we succeeded when we came home with 480B. She is a big cow with a huge top and a big square hip. Not sure what the thought process was last summer when we bred them both to Bridle Bit Resource, but the outcome could be interesting. The power of these two females backed by the 480B cow, crossed with maternally stacked pedigree of Resource. Stay tuned, we'll know a little more by sale day, with a little luck both calves will be alongside.

This PB heifer offers a lot of mating options. We chose Flat Iron for a $\frac{3}{4}$ calf. She's an interesting individual to analyze, moderate in frame, yet extremely powerful in her makeup. We are super impressed with her rear hip and leg structure and flex in her pastern. I don't know a lot about the club calf world, but I believe she could do some neat things there also. She's one of those heifers we hope you're able to make the sale and appraise her for yourself.

She may not be the biggest heifer in the pen, but I'm willing to bet this Teardrop X Cashflow heifer is going to make a nice momma cow. There were several folks scouring the country last spring to find a good Teardrop son as he is deceased. We bred her to ES Statement who is a bull that worked on heifers, yet the calves tipped the scales as well as any in the fall.

We made a lot of high marks on this gal when we evaluated them for footnotes. My short notes were "cool looking, attractive, nice udder coming". It's always exciting to see where the new home will be for heifers like this, naturally we'd like her to stay here. There's quite a story on her AI sire, Progressive, but that's for another day. Take a look in the bull pen, I expect the Progressive's will generate a lot of interest on sale day.

Around our place heifers like this are the ones that raise the big herd bulls. She offers a bit more skeletal frame. Has lots of volume and a big hip. She's powerful yet with a lot of eye appeal. She looks a lot like her mother, D1. She'll have a homo black, homo polled, Purebred GPS calf. This will be our first calf crop of GPS offspring.

If you're looking for a heifer with a little more scale, super long sided and beautiful front end this gal fits the bill. With our experience a female like this is the perfect mating for Bridle Bit Colorado. There is a lot of performance on the bottom side of this pedigree as is evident by her WW ratio of 109.

Our experience is the Lock Down females make awfully nice cows with good udders. These gals are big powerful heifers yet with a soft look. Their full brother was selected by Paul Rydeen in 2017, the biggest difference may be what they are bred to, one to Eagle, the other a blaze faced TJ Frosty son selected by Gibbs Farms. Three generations back on the bottom side of the pedigree is our T202 foundation Red Angus cow that so many pedigrees go back to.

We are very anxious to see our 1st GPS calf to be born on the ranch and this one may be the one. We selected GPS as a heifer bull last year in the Bridle Bit sale. Seeing the same value is All Beef then Genex where he will be in their lineup this coming spring. The H61 cow should have many friends being mid-sized with a bold middle third.

This feminine made individual is royally bred. Back in 2015 when her mother, A117, had her first calf at side there were two full sisters we were debating on as to which one should be in our donor pen, the other being the A110 cow, the mother of several powerful bulls in the front of the catalog. Her mother, A117, is a tic more moderate with plenty of milk. We are excited to get our 1st Platte River calves this spring, they tend to be very consistent, in a good way.

Stop the press here boys, this little gal is a looker. As of this writing she's 2 weeks from calving and her udder and teat development looks spot on. Hopefully by sale day she doesn't make a liar out of me. We didn't get her legs right in the picture and I'm not sure what the video will look like, but after the in-person appraisal I'll take a whole pasture full of these. Her grandam is the A110 cow who has the nice flush of bulls in the sale.

This solid black Full Figures daughter has brood cow written all over her. Her dam, B58, always received high marks for udder quality at calving. At this point H105 looks to have some of the same qualities. An added bonus is her stayability EPD is in the top 1% of the breed. We are anxious to see her PB calves by Resource, a new bull in our AI battery to use on heifers.

Take a look at the three full sibs that sold in prior sales. A full sister was the high selling bred a few years ago and two full brothers were powerhouse studs last year. This gal is very feminine and super long sided in a slightly larger framed package. We feel the guess work is taken out of this one and her Lover Boy calf could be the icing on the cake. We only had a couple of Lover Boy calves last year, but they sure have a nice look to them.

Another great example why we have and will continue to use Authority on our Red Angus cows, it just flat works. She exhibits that great combination of beauty and power. She has a WW ratio of 108. These Authority X Red Angus have been popular over the years whether they are in the bull pen or the heifer lot the commercial guys love them. Her dam is an 11-year-old cow that knows how to maintain her spot in our herd.

Any one notice all the attention given to red baldy's lately? Several high-profile bulls have rung the bell from \$100,000 to \$300,000 over the past year. One could only imagine the mating possibilities this gal could entertain. We chose Lover Boy for her first go. We saw a few Lover Boy heifers at the Jr. National last summer and feel the combination of Lover Boy's style and elegance with H57's power and muscle could be explosive. She has the parts to be the foundation of a red baldy program.

If there's one red heifer we want you to find sale day this is her. As far I'm concerned, her structure is spot on, especially her rear leg. Usually we only use Cadillac on heifers but her dam's first bull calf purchased by Elton Stoeber, was so impressive we had to go back to the well again and couldn't be happier with the results. She was a big WW individual ratioing 116. Dam has a WW ratio of 107 on four calves. **NEWS FLASH...** it's Super Bowl Sunday and H67 is thinking of calving, so we ran her in the barn, went to the house (had wings in the smoker) looked at the calving camera and she had it already! That's cow power and she's a sweetheart for disposition.

Within the Red Angus division, this one offers the most frame and length of body as do the three generations succeeding her on the bottom side of her pedigree. Her sire, Make Mimi, has been one of our go to bulls over the last 15-20 years. He works on heifers; the calves have adequate growth, and the females make nice cows. As long as we have Make Mimi semen in the tank, we will continue to use it.
