WELCOME!

EICHACKER SIMMENTAL FAMILY

Bridgett, Becki, Greg
Dana, Amanda, Judy, Haley, Adam, Cathy, Steve, Jordan, Nick
Taylor, Hunter, Andi, Emmitt, Ellie

Another year has come and gone and just like all the other years it has had its ups and downs. We went from drought conditions in early spring to flooding in early summer then back to drought by early fall.

We certainly want to take this opportunity to say THANK YOU for your interest in our cattle operations here at Eichacker Simmentals and JK Angus. We know you can buy your bulls, and good bulls, from a lot of different producers. The other day the mailman dropped off the mail and there were twelve sale catalogs with a big rubber band holding them together in our mailbox, all in one day. Then the Fed-Ex driver pulled in three days in a row to drop off catalogs. So yes, there are many choices, but the bull business is a people business and at the end of the day it's who you want to do business with. And the fact that you are even reading this means more than you'll ever know.

For those that didn't know we'd like to welcome Zac Heumiller back to ES. He had been working here for over 12 years before taking a few years off to experience other work adventures. We are so grateful to have him back as part of the ES crew! And oh my, did we have fun this summer with not one but two weddings. Yes, two of McCook County's most eligible bachelors got married, Billy & Nadine were married in June and Adam and Haley joined hands in August with a fun reception in our shop! Congrats and welcome Nadine & Haley!

Some of you may think Christmas can be a little hectic around the house, but you should walk into a seedstock producers' house at sale catalog time. The office and kitchen table are scattered with computers, pedigrees, weights and measurements, cameras, video camera, pictures, and notebooks full of footnotes. But like a Christmas miracle, as a deadline approaches it all comes together into a beautiful sale catalog.

The world is changing and changing fast in how we evaluate cattle with what DNA has brought to the table in the past five years is unbelievable. There are people who literally sit at their computer and sort their replacement heifers based off the DNA. Don't get me wrong, we still feel there's a lot of cowboy logic that goes in cattle selection but there are other tools available that can help in the process. Like we have for the past few years, we have the RightChoice logo to help find the bulls you're looking for.

ZAC HEUMILLER

To really give you something to think about, Top Genomics has another tool available called RightBull, there's a flyer on page 3 in the catalog with more information. In a nutshell we would love to visit with you on this option if you want to take your bull selection to a whole new level.

We had an awesome week of weather at the end of January to picture and video, so the bulls are already videoed, so hopefully they'll be displayed on DV Auction shortly after the catalog goes to print.

We worked with Marty Ropp and Allied Genetics to secure some embryos out of some of the elite donors in the breed to offer some bulls with a few new bloodlines. We hope you enjoy sorting through them as much as we have, there's a lot of information in the footnotes to help you in the selection process. FYI we even put in more embryos last spring.

On that note we want to thank and acknowledge Glen, Kurt, and Heath over at the Kummer Ranch for the dedication and great work they have done as they have been awesome partners for many years.

The sale will once again be a video auction, and videos will be available by mid-February on our website and DV Auction.

The cattle are always available for viewing prior to the sale. The Simmental bulls and heifers are at ES and the Angus bulls are at JK. Each of our operations is only two miles off I-90 but there are fifteen miles between exits.

Thanks again for your interest in our operations, it's not taken lightly. If there's anything we can do, don't hesitate to call. Come early and stay after for some great hospitality.

HOPE TO SEE YOU ON MARCH 7.

Eichacker Simmentals & JK Angus

VIDEOS WILL BE AVAILABLE AT WWW.EICHACKERSIMMENTALS.COM OR WWW.EBERSALE.COM

FRIDAY, MARCH 7, 2025

Friday, March 7, 2025 at 1:00 PM At Eichacker Simmentals, Salem, SD

DIRECTIONS TO SALE SIGHT: Eichacker Simmental Farm, 25446 445th Ave, Salem SD 57058: Exit 368 (Canistota) on Interstate 90, go 2 miles North, Eichacker Farm is on the East side of the road. From Salem: Hwy 81 & 38 intersection, go 4 miles East and 1.5 miles South. Farm is on the East side of the road. Sale facility is on the west side.

SCHEDULE: Cattle may be viewed at the farm any time prior to Friday, March 7, 2025.

Friday, March 7 Cattle on Display at Eichacker Simmentals
Complimentary Lunch Served 11:30 AM
51st Annual Eichacker Simmental Bull & Female Sale **1:00 PM**

VIDEO AUCTION ON ALL CATTLE!
- No cattle will go through a sale ring -

Motels
Hampton Inn, Mitchell, SD 605-995-1575
Quality Inn & Suites, Sioux Falls, SD 605-336-1900
AmericInn Hartford, Hartford, SD 605-528-5000

Terms of Sale
All cattle will sell under the suggested sale terms and conditions of the American Simmental Association. Terms available sale day.

Announcements
Announcements made sale day and from the block take precedence over printed material in sale catalog. Anyone attending this sale attends at their own risk. Eichacker Simmentals or any of the sale force will not be held responsible for any personal injury while attending this sale.

EPDs
All Simmental bulls and females have genomic enhanced EPDs.

Feeding & Delivery
ES will offer to feed the bulls at no charge until April 15, 2025. JKAngus will offer to feed the bulls at no charge until April 1, 2025. At that time, they will be semen tested and delivered free of charge up to 300 miles. We will assist in making the most economical arrangements possible beyond that. We are not responsible for any injury or death to the bulls while in our care. We would appreciate pick up or delivery arrangements of the bred heifers to be made within a few days of the sale.

Trucking
Craig Kaisand 641-891-9666 • Dick Coleman Trucking, 765-461-0954

Volume Discount
Volume Discount on bulls ONLY: 3 bulls 3%, 4 bulls 4%, 5 or more bulls 5%

Insurance
Insurance will be available, details will be announced sale day. In no case will seller be responsible for more than the purchase price of the bull.

Health
All bulls have been tested negative for BVD/PI. All cows are Johnes free. All genetic defect testing has been completed.

Calving Ease Score ★★☆☆
We have put a column in with a CE Score with 1, 2, 3 or 4 stars. 1 star being harder calving and 4 stars being the easiest caving. It is just our opinion of what you could expect taking into consideration the BW, EPDs, pedigree and structure of the bull.

Semen Interest
Eichacker Simmentals will retain ¼ revenue sharing semen interest in all ES bulls selling and JK Angus will retain 1/3 revenue sharing semen interest in all JK bulls selling. This means if we would like to collect semen on the bull for our own use, we would have the option to do so. Also, if semen is sold ES would retain ¼ revenue from the ES bulls and JK would retain 1/3 revenue from the JK bulls. The new owners of the bulls will have full possession and full salvage value.

Adjusted Scrotal – Simmental Bulls
Actual scrotal measurements were taken on 1/27/25, then adjusted to a year of age using each breed's own formula for adjusted scrotal measurements.

Weight Per Day of Age (WDA) – Simmental Bulls
WDA is the weight of a bull on 1/27/25 divided by the days of age.

130 Day Weight (PWG) – Simmental Bulls
The 130 day gain was the average daily gain from the weaning weight until 1/27/25.

**Guest Breeder: JK Angus – Billy Kapperman 605-940-2504 – Ross Hoefker 605-359-5022

SALE INFORMATION

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and the they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

Precision genomic selection tools FOR THE FUTURE of commercial beef production

Many of you have seen the unprecedented results created by the RightMate and RightChoice tools for precision matings in the beef genetics industry. Now, Top Genomics offers tools that use the same, cutting-edge technologies, but in a format that is better suited to the way most commercial herds breed cows.

With a genomic snap-shot of your commercial cow herd, it is possible to sort a group of sale bulls or AI candidates to best match your particular situation and wishes. RightBull provides substantially more insurance of success than just paging through a catalog or walking from pen to pen. Ultimately, you make the decisions from the prescribed short list based on the traits and factors you prioritize.

Additional Options

- Choosing ideal heifer bulls is great strength of the RightBull and RightMate technologies.
- Top Genomics can sort females in your herd into more similar groups making bull turn out more precise.
- Genomically sort the cow herd into desired outcome groups, then prescribe special purpose bulls.
- RightBull is also available for seedstock providers wishing to purchase genetics.

The PROCESS

- 1** Access, if genotypes are currently available, or genotype a minimum of 25% of the existing cow herd (25 head minimum in cow herds <100). This minimum percentage may differ slightly depending on group sizes and total females to mate, but the more females genotyped the more accurate the evaluation. For some this will be a decision to genotype the entire herd or at least all of the young females. The information delivered to Top Genomics must be in the form of raw genotypes and not genomic scores (please contact Allied for questions) in order to get the core information needed for RightBull.
- 2** Get permission from you seedstock provider to access to the bull genotypes and EPDs, then transfer that information along with the genotypes of the cow herd to Dr. Mahdi Saatchi at Top Genomics, LLC. If he already has those genotypes, this process is even easier.
- 3** Participate in a conversation with staff regarding your mating plans and breeding objectives so that the results can be better customized to your management practices and genetic goals.
- 4** Top Genomics will provide you a RightBull ranking and %Genomic Match for bulls in that particular offering for you to use as an important "first sort" in preparation for purchase.
- 5** Please allow 5-8 weeks from the time you collect DNA samples to expect results, but just 2 weeks for the RightBull evaluations to be completed if your cow's genotypes are already available.

MARTY ROPP 406-581-7835

RightBull
powered by  TOP GENOMICS

- These DNA programs have been moving like the speed of light! It started out with Genomic Enhanced EPD's which entailed having DNA sent in on each animal and getting back Genomic Enhanced EPD's, that in many cases was the equivalent of the animal having 15-20 progeny sent in. ASA then produced the Cow Herd Roundup to have entire cowherds done. Then a few years after that the Calf Crop Genomics was the next logical program ASA initiated.
- We then incorporated the RightMate program where through genomics they told us which bull through AI was the best choice to breed that particular cow to. At about that same time we incorporated the RightChoice program which is the 3 logos G+, ACE & ATM by each lot that helps with the selection process for you, the buyer, to get the right bull for your herd.
- For those out there that want to take the bull selection process to a whole new level, we can now offer the RightBull selection tool. It involves collecting DNA on 25% of your cow herd. Then knowing the genotype makeup of your cow herd you would have a conversation with the Allied staff to see what your goals are. With your data and goals in mind they would run a match with our bulls in the catalog as they already have genotypes on file and you would end up with a list in order on which bulls are the best fit for your cows. If you ask me, it makes the bull selection process quite simple. Once you have the DNA on file, there are other tools available also. You could sort your opens for which ones make the most sense to retain, or sort your cow herd to go to different pastures with like genotypes to match a certain bull.
- If you have any interest whatsoever in moving your program in this direction, we'd love to have the conversation because yes, it does come with some cost but that's where we at ES are willing to step in and help you out.

6 Full Brothers

- I suspect the commercial guys to be two deep in the pens where the six flush brothers are going to be standing. After spending a few hours in the bull pen the other day there was definitely a WOW factor after finding these six brothers. If you're looking for bulls to add a little size and length to a set of calves, take one or take them all, you can't go wrong. It's an old cliché but I do recommend watching their videos as we feel the bulls are better than their pictures
- Their dam, H129, made a big splash last year with her flush of CLRS Homeland sons, they were an awesome trio of bulls going to Barry Olson, Jerry Hink and Pete Bakken, then on the heifer side, check out ES L150 (Lot 136) in the heifer division. I'm pretty sure we'll be hearing more from H129 in the future

- The H129 cow is just making her mark as a possible replacement for the A110 cow who has definitely left an impact on our place. She has a tremendous amount of body and near perfect in terms of structure, feet and udder design
- On the genomic side their BW & CE EPD's are certainly acceptable for cows, but their WW & YW #'s put them over the top, keep the females and if you need to add marbling, these boys cover that also and their API & TI indexes are all very acceptable also

- The bull hit me pretty hard the other day, then when we sat down with the data I see why. He's the #3 bull for PWG and #4 for WDA and has WW & YW EPD's that rank him in the top 1% of the breed
- All of that performance is coming from the top and bottom side of the pedigree, both the sire and dam are in the top 1% & 2% for WW & YW
- Sometimes when you talk about all of that performance it comes in an ugly package, but that's not the case here. He's got a great top and hip but keeps it pretty neat and tidy on the front 1/3

- Back in 2022 Chad Cook offered a select group of opens for sale in their production sale. We couldn't resist the opportunity to tie into one of his most prolific cow families, the B452 cow. The mother of these three bulls, J129 is B452's natural calf by KBHR Cimarron. The B452 cow is the mother of Bridle Bit Resource who is the sire of the Recharge bull working for CK Cattle. To muddy the water a little more, the J129 cow and the dam of another flush of bull in the sale, G9107 are maternal sisters. So quite honestly there's a segment of this sale that's just like being in Walsh, Colorado
- There are definitely some differences in the three bulls both genotypically and phenotypically and what we see matches the paper pretty well in my opinion. We gave the MJ129-1 (Lot 10) 4 stars for CE with his -5.4 BW EPD. With the other two bulls being the performance bulls of the trio. The MJ129-2 (Lot 8) even has the 6th heaviest PWG
- As the calves were raised at our cooperator herd at Glen Kummer's I have no explanation for the Adj WW's as I don't know the recip cow situation, so we always feel it's more accurate to go back to their EPD's as these have all been DNA tested and are genomically enhanced EPD's

- He's a moderate sized bull that has a real cool look
- A smaller head that blends into his shoulder awfully nice, looks to be a real trouble-free package with his -3.5 lb BW EPD and CE & BW EPD's that rank him in the top 10% of the breed
- Has a stayability EPD that ranks him in the top 1% of the breed

- He's not the biggest bull in the pen but I physically cannot pick him apart, he is really complete with a nice CE look
- His sire is on his maiden voyage with his first calf crop just hitting the auction blocks around the country this spring
- His six year old dam got a 9+ on udder score a few years ago and has a WW ratio of 102 on four calves

- There's a lot of time, thought, and money goes into raising embryo calves but when you get a flush like this you just nod your head and say, "it's worth it". Their dam is a powerhouse full sister to the ever-popular Bridle Bit Resource bull. The maternal pieces are all there and her phenotype is near ideal. She is deep sided, easy fleshing and great footed
- It doesn't happen often, but we put in seven embryos and got seven calves, the four bulls are here for your appraisal and the three heifers are in the replacement pen. I admit there is one of these bulls I think is pretty special. There are some differences so I'm not going to say which one I like as everyone looks at cattle a little differently and may gravitate a different direction
- These boys are top shelf when it comes to their genomic profiles. There are some differences, a couple offer a little more CE and a couple have a lot more growth. When it comes to maternal, stay, docility, they will all work and marbling, API, and TI they are all in the top 5% of the breed. Genomically they are very uniform. Two of the individuals are even in the top 10 bulls for WDA

- I'll be the first to admit you'd never guess these two bulls to be full brothers. M94F-1 (Lot 18) is a little more moderate and super stout and thick. Holy crap can he turn a few heads when he steps onto the dance floor, he is one cool looking dude, kind of like the Fonzy on Happy Days
- The other brother M94F-2 (Lot 19) is a bigger framed stretchy bull that carries a cool baldy face. Both have birthweights that are in the 60lb range and a set of EPD's that are well balanced across the board
- Their dam is the 94F cow that was claimed to be one of the best Beacon daughters to come out of the Hook program, and they had a lot of them. She now resides at JC Simmentals in Michigan, and we had just purchased a few embryos

- In our search to bring in some new cow families to offer some fresh genetics the 94F cow was strongly recommended as some feel she is one of the best Beacon daughters to surface. So, we bought two sets of embryos out of her, LCDR Reserve and this group the LBRS Genesis
- When it comes to maternal and carcass especially marbling, these guys are top shelf. They also have API's and TI in the top 5% of the breed
- Full sib brothers have led off John Miller's bull sale in Michigan and a full sister, June 24J, is now in the donor pen

SONS OF ES ALL BEEF F113

ES J39, Full Sister to Lots 23, 24, 25, 135-135C

- When you have a flush like this where the bulls are all in the bull pen and the four heifer mates are like peas in a pod is what makes what we do worth it all
- We feel these three herd sire candidates have a boat load of potential. I'll be the 1st to say, they're not identical, there is some differences especially after the genomic enhanced EPD's came back. The F113-1 and F113-2 are a tic bigger framed with the F113-3 still very good in his type and kind
- The amazing part is to have all of the power and performance these three have, yet only have BWs of 68, 68 and 74 lbs
- The real story here is their amazing dam, the F113 cow, she is the natural calf of a bred heifer, 6096D, that Marty Ropp had found at Cow Camp back in 2018 and asked if we wanted to partner on her, which we did. The F113 was her natural calf. The F113 cow grew up to be a spitting image of her mother, just a tic bigger. Tremendously easy keeping on a great set of feet and legs and they both have udders that are pretty close to perfect as far as we are concerned. Flash forwards a few years to our production sale in 2023 when Jared Seinola of Five Star Ranch had a bid off with Tom Hook and ended up with the high selling bred heifer, ES J39, for \$23,000. She had that beautiful udder much like her mother and granddam. When Jared purchased J39 she had a Progressive bull calf along side which he sold in the next spring's bull sale and commanded \$35,000. At the time of this writing their 2025 sale is six days away and I believe there are six more 1/2 brothers that will be getting their fair share of attention
- These bulls are powerful, but I truly feel their real value will be the replacement females they will sire for years to come. Be sure to check out the pen with the pick of the four full sisters and you'll get a feel for what we are thinking, and the plan is to have their dam F113 on display with them also

- A unique opportunity for a royally bred heifer bull, the natural calf out of the F113 cow, the mother of the pick of the Genesis full sisters
- His 74lb BW, 21.3 CE and -4.2 BW EPD's along with his trouble-free confirmation make him a logical calving ease choice. The only better thing is if they had the ACE logo for calving ease
- The real value may be the replacement females as F113's udder is awesome and Paul Rydeen states his Global females look fantastic as bred heifers, Global's 1st calf crop

- Global son with a lot of gas in the tank. He'll be in the pen with the big boys on sale day. He's in the top 10% of the bull for WDA
- He's a product of some embryos we purchased out of GW 038W. After an extensive career at Gateway Simmentals where she raised the Lot 1 lead off bull 4 different times, which is no easy feat in Lewistown, MT, she moved into an extensive embryo program and currently has 91 offspring in the database to her name and still counting, she is 16 years old and still cranking out eggs
- Love the fact that his stay and docility scores are in the top 1% & 2% of the breed. He helped me write footnotes the other day as he followed me around the pen all afternoon wanting to lick the clipboard

- With Nick's keen eye for cattle evaluation and working the picture and video pen for 3 days, he highly recommends this bull. I will also admit there was a bit of a WOW factor when he came through the gate
- With his width of rib and great structure it was a joy to just watch him move about the pen. He's a bull that on delivery day we're going to be proud that he's an ES bull coming off the trailer, but you'll be even happier that it's your pasture he's going to
- His dam is a powerful red baldy female out of Major Move that has impressed many who see her

- He carries the KBHR brand top and bottom. Sired by KBHR Global, the calving ease bull owned by the Paul Rydeen family and his mother's sire is the \$102,000 bull, KBHR Honor. Then throw in a few cows like Keller's 106Z and Sugar C4 along with our own A110 and it's a who's who pedigree
- We like this bull quite well right now but the way he's growing since weaning almost cracking the top ten in PWG, he could really look impressive by March 7

- On February 15 the crew over at Glen Kummer's thought they were seeing a little double vision. I've been in their office at the calving barn, and I can understand why and let's just say they have supplies to withstand a pretty good snowstorm and not die of thirst. Glen called and said "Steve we put in 1 embryo, and we got 2 calves, and they look very similar, what's going on?" The answer is embryos can split!
- These two are ultra-attractive and ought to sire a ripping set of replacement females
- One of our favorite bulls in the sale last year was Lot 1, a full brother purchased by Harlee Heim for \$16,000. Being twins, these two are not as powerful today but we feel the genetic potential is certainly there

- This bull gets my blood pumping a little, he's one of those great examples that you can have it all. It's easy to see what all the hype of Galileo is
- His genomic profile is phenomenal with 12 categories in the top 20% or better in the breed
- He weaned off the #5 WW bull to ratio 115 and I'm not even going to describe his physical appearance, look at the picture or better yet, watch is video
- What I feel takes him to another level was the day he was born his Bridle Bit Resource mother was awesome. She was a great mother with a good attitude and an udder I wish every cow on our place had. At the time we heard Resource was not making semen, knowing we wanted to continue that bloodline and CK Cattle was selling some Bridle Bit Recharge semen, a Resource son, a few days later, we went to Highmore and bought 20 units on their sale for about \$240/unit

- Another Galileo son that checks all the boxes and will move any program forward. We are truly excited to see what everyone's appraisal of this stud is
- Physically he's the rare combination of a big, bold robust body yet with a smoother calving ease look. This is his mother's maiden voyage for raising a calf but keep this up and her ship will have many more voyages
- Love the fact that he's out of a TJ Gold daughter and ranks in the top 20% of the breed in 11 different categories

- Yes, I gave this bull 4 stars for CE without Mahdi's blessing of an ACE logo. But I guess I used a little cowboy logic here. All my notes in the lot referred to him as a very nice calving ease prospect, moderate sized, lighter boned, nice-small head that blends neatly into his front shoulder, and that's without any numbers
- The statistics confirmed what the eyes were seeing with his 68lb BW and CE & BW EPD's that put him in the top 1% and 3% of the breed
- A Galileo X TJ Gold X our A110 donor that's power in the pedigree

ES LD113, Maternal Brother

- A really long sided Medicine Man son with WW & YW ratios of 109 & 108
- This guy's pedigree is almost certain to be an outcross pedigree from anything, both top & bottom side
- His WDA puts him in the top 10% of Simmy bulls for gain

ES J11, Maternal Sister

- Here's a great example that you can have it all. He's a bull we really like out in the lot, but when you sit down and study him on paper the blood really gets pumping
- Boasts WW & YW Ratios of 112 and his WDA puts him in the #6 position
- What really puts him over the top is his maternal possibilities, his dam has received some high udder scores over the years and check out her two daughters ES J9 going to Deryll Riley in NE in 2023 for \$10,000, the other, ES K74, you will have a chance to own her on March 7. Full disclosure here, Adam just told me last night that L74 is his favorite bred heifer

- Sit back and listen to this pedigree... JC Quiet Man out of a daughter of the \$102,000 KBHR Honor then back to a full sister to ES Right Time. I'd be willing to bet a fair amount that there is no other animal with that same pedigree
- It goes without saying he is an easy bull to find in the pen and we've had our eye on him all summer in the pasture and he just keeps coming on. Can't wait to see what he looks like in another 30 days
- He's so much more than just a picture bull; he's top tier for performance ratioing 114 for WW and 108 for YW. Brings a lot of carcass potential to the table, REA is even in the top 1% and API and TI in the top 15% and 4% of the breed

- This blaze-faced LRS Rarity's son is a rare find. We sampled this Lassel bull the last couple of years on heifers and man can those calves grow
- We got a long calving just fine, but he probably belongs on cows and he's an excellent choice for adding some frame and pounds to a set of calves
- Look at his WW & YW ratios at 111 & 112, he's been a standout all year long and it doesn't hurt he's in the top 2% for REA

- Backed by a cow family that's doing a lot of the right things, his dam has a WW ratio of 106 on three calves then on to ratio 110 for YW. And his granddam brought home 12 calves over her long career before retiring last year
- Much like his maternal brother last year, his WDA and PWG are toward the top end of the list
- His sire CCR Nationwide, was a popular CCR Pounder son in the Cow Camp 2023 sale that traces back to one of the Cow Camp's top cow families

- Tremendously long sided bull that would do a nice job on some smaller British based cows to give you a fancy set of feeder calves with a little chrome
- I'll be honest, I'm not sure where it all comes from but has WW & YW EPD's in the top 20% of the breed
- We have used his sire successfully on heifers and his smaller head and sleek neck and shoulder would indicate he may offer some calving ease also

- His dam is 15 years old, and we are going out on a limb and say this is her best one yet
- We really like the Hollywood sire group; they are stout and thick and have a great physical quality
- If you have some Red Angus in your herd, I think incorporating a little WS Hollywood in the herd would be a homerun

- This bull came into the picture pen and hit the pose and out he went. Trust me, those kind seem to be far and few in between. This guy reminds me a lot of his maternal sire, WC Fort Knox, stout, thick with a big ol real bumper. I've always said some cattle have it and some don't in the picture pen and Fort Knox cattle have it
- This guy hit the scales pretty good rationing 108 for WW and 105 for YW
- His granddam is our D55 cow, the mother of the great Major Move flush with a red son in this sale. She is also the mother of ES Pursuit, working for Doug Bichler

89

- If you're looking for a moderate, stout, super thick red bull that's very correct on his wheels, here's our recommendation
- Granddam is our Y60 cow who is no stranger in bringing bulls like this through the sale ring year after year
- His 77lb BW and G+ logo make him a very practical choice

- We've been patiently waiting two years to be able to offer these two powerful red bulls for your appraisal. They are the product of a small embryo package we purchased in our quest for some different bloodlines. Full disclosure, I was hoping for at least one heifer
- RFS Luna is arguably the best and most powerful daughter of Electra to date. At over +100 for WW while still maintain a top 10% ranking for CE & BW. She represents the kind of spread genetics the industry is striving for
- With all the power and performance these two offer, you would never guess they only started out at 66 & 72lbs. They are both impressive but MK63-3 (Lot 91) was actually the #1 bull for PWG at 4.4 lbs/day. These guys only get better when you look at their genomic profile with many categories in the top 10% of the breed
- If you're in the market for some powerful red bulls these two may be worth the trip alone

- If your calves grow too fast and weigh too much when you sell them, then you may want to look for a different bull because all indicators say MK15 is going to add performance
- Has WW & YW ratios of 110 & 110 and WW & YW EPD's that rank him in the top 10% of the breed
- Use this dark red bull on a set of Red Angus cross cows and you'll be smiling all the way to the bank or better yet imagine the impact for years to come on his replacement females

- If you're looking for our #1 performing red bull, here he is. He has a whopping 116 ratio for both WW & YW, then a quick glance at his EPD's and he is in the top 1% for WW, YW, ADG and MWW
- He's one of the larger framed bulls in the pen so if it's lbs you want, he's the man
- He's a fun bull to put your eyes on as we've watched him close lately and I can't say there's anything I would change. Even his attitude is pleasant

This bull is out of a recip cow that we couldn't ever get the parentage figured out on and thought she had a embryo calf, turns out it is out of the clean up bull. We thought he was way to good of a calf to let go to waste. He is a high growth big framed stout bull that would make anyone an awesome set of calves.

Special Open Heifer Pick Lot

BEAUTIFUL DAUGHTERS OF ES ALL BEEF F113

LBRS Genesis G69
Sire of Lots 135-135C

- The day this group of calves came off the trailer from our cooperator herd at Glen Kummer's I knew they were kinda special. These four heifers and their three full brothers in the bull division put a smile on our face as we processed them through the chute. They were just as consistent and represented the type of cattle we like to raise. When we got in the house that night I told Cathy we need to sell pick of those four F113 X Genesis heifers in our next production sale...and by golly, here they are!
- We can't say enough about the maternal side of the pedigree, their granddam was a very low maintenance cow that came from Cow Camp. She put on weight just looking at grass and had a perfect udder. These heifer's dam, ES/All Beef F113, was the 1st natural calf out of the Cow Camp cow, 6096D, and is just like her mother. Four out of her first 5 years of raising a calf here at ES, she received a 9+ for an udder score
- The real success story was when Jared Seinola of Five Star Ranch selected a full sister to these four heifers, ES J39 for \$23,000 in our 2023 production sale. She had a LCDR Progressive bull calf along side which they sold for \$35,000 in their bull sale the next spring and may have another awesome group of bulls out of her in this year's sale. Nothing is more rewarding for a producer than when your stock does well for others
- We ran the heifers through the Right Choice program with all four coming back as a G+ with M146, M147, M148 also having the ATM logo. We feel the upside potential on this group of heifers is unlimited and can't wait to see which one is selected.
- Working with this group through the clipping and picturing process has been a treat as well, they all have a pleasant disposition as do their full brothers in the bull pen
- **Reserving the right to one flush with a minimum of six quality embryos on the heifer selected.**

Selling choice of the open heifer mates to ES/All Beef F113 X LBRS Genesis G69! Full sisters to our high selling bred heifer in our 2023 sale going to 5 Star Ranch!

ES LH129-3, Full Brothers

ES LH129-1, Full Brothers

ES LH129-2, Full Brothers

- We swung the barn door wide open to let these two go. They are the only two Homeland daughters out of the same flush that produced three stud herd sires that sold in last year's sale. ES Tornado LH129-3 went to Barry Olson for \$18,000, we thought enough of him to collect semen and use back in herd, the other two went to Jerry Hink and Pete Bakken. I would have to say, whether we are talking bulls or females, the guess work is done with this mating. The H129 cow is making quite a case to take over the throne that has been occupied by her mother A110 for so many years. If you still have any doubts, slip back to the bull division and check out the flush of these two heifer's mother, ES H129, has out of LCDR Diligence, Lots 1-6 are sure to have lots of friends March 7
- The baldy, L149, is the flashy one that is mid-sized with great hip. Her feet are as good as any cow we have. Her calf will be one of the first out of our new herd sire KBHR Kota
- Some might wonder if there's almost too much heifer here, she's a tank. I interpret her look as the type that can raise herd bulls, she's my kind. ES L150's calf could very well be worth the trip to Salem alone. Sired by Bridle Bit Recharge, the high selling bull at Chad Cook's a couple years ago at over \$100,000 to CK Cattle from Highmore. The first Recharge heifer just sold under the bright lights of the NWSS for \$67,000. The Recharge bulls also highlighted the recent CK Cattle production sale.
- The genomic profile of these two heifers is very versatile with many traits in the top 25% of the breed

Pasture Sire: CLRS Jericho 336J from 6/20 to 7/30/24

- We thought we were done taking pictures of heifers til Cathy said we forgot one. I'm glad we went back to look because what a find she is
- She has a real nice running gear under her as she cruised around the picture pen
- She comes with a KBHR Kota baby alongside, Kota was one of the three Genesis brothers that led off the Keller Broken Heart sale last spring

- When we sorted for sale heifers last November one of our favorite sire groups was the CLRS Jericho's
- The maternal side of this pedigree is rock solid with good udders and a granddam that had a WW ratio of 111 on 11 calves
- A beautiful maternal sister sold to Adam Strutzman in Nebraska in last year's sale

 Carcass: 26.6 -.27 .45 -.04 .72 165 90
 Pasture Sire: CLRS Jericho 336J from 6/20 to 7/30/24

- L79 is a product of combining low BW and high maternal and has a nice docility
- KS Net Income has been a nice sire group for calving ease in the bull division for the last couple of years
- Her dam, H203, has earned some excellent udder scores the last three years, even getting a perfect 10 one time (not easy to come by)
